Wedge Anchors • *The choice is yours!*

Kingpin Wedge Anchor

This Wedge Anchor is used for heavy duty fastening applications where high pullout values are required. The anchor and the hole diameter are the same, simplifying anchor installation. The advanced design of the collar, with three protruding prongs to grip the interior of the hole, reduces the likelihood of the anchor "spinning" during installation. In addition the hole depth is not critical, as the wedge is non-bottom bearing, although the hole must be at least as deep as its minimum embedment depth.

RED HEAD® TRUBOLT®

TRUBOLT® Advantages

Versatile fully threaded design is standard on sizes up to 3/4" diameter and 7" in length.

Anchor diameter equals hole diameter

One piece stainless steel expander clip resists corrosion.

360° contact with concrete assures full expansion for reliable working loads.

Non bottom-bearing, may be used in hole depth exceeding anchor length.

SVI Part Number	Type	Diameter	Length	Minimum Embedment	Thread Length	Box Quantity

RED HEAD® Rotary Hammer Carbide Bits

SDS Plus

Fits SDS drive rotary hammers.
 Stronger shaft and core than industry standard for longer bit life.
 Extra strong "HL" grade carbide tip means faster drilling and longer bit life.
 Made to ANSI standards.

SVI Part Number	Diameter	Overall Length	Drilling Depth
BH-7063-08-06	1/2"	6"	4"
BH-7063-08-12	1/2"	12"	10"
BH-7063-08-18	1/2"	18"	16"
BH-7063-10-08	5/8"	8"	6"
BH-7063-10-12	5/8"	12"	10"
BH-7063-10-18	5/8"	18"	16"
BH-7063-12-08	3/4"	8"	6"
BH-7063-12-12	3/4"	12"	10"
BH-7063-12-18	3/4"	18"	16"

SDS Max

Vacuum heat-treated tool steel at core is 25% stronger.
 Vario flutes with progressive angles for straighter holes and faster dust removal.
 Double helical flutes for strength.
 Tapered core for faster drilling.
 Made to ANSI standards.

SVI Part Number	Diameter	Overall Length	Drilling Depth
BH-7064-08-13*	1/2"	13"	8"
BH-7064-08-21*	1/2"	21"	16"

BH-7064-12-13	3/4"	13"	8"
BH-7064-12-21	3/4"	21"	16"
BH-7064-12-36	3/4"	36"	31"

SDS Max Multi-Cutter Head. Improves bit life by 50%, reduces vibration and noise and extends hammer life.

* 1/2" bits are single tip carbide; all others are multi-cutter

Spline Shank

Splines held to very close tolerances ensure perfect fit and improved impact transmission for fast drilling.
 Annealed shaft helps prevent breakage.
 25% stronger steel for longer bit life.
 Extra strong grade carbide tip means faster drilling and long bit life.
 Made to ANSI standards.

CONCRETE-TERMITE Rotary Hammer Carbide Bits

SDS Plus

Fits SDS drive rotary hammers.

Speed range 400-100 RPM at up to 4500 blows per minute.

Carbide tip is composed of a powder made up of Tungsten Carbide, Carbon, Cobalt, and other metals which, under heat and pressure are formed into a bit tip.

Made to ANSI standard B212.15-1994.

Rotary Drill-Only Carbide Tipped Rebar Cutter

At last, the answer to drilling through concrete-embedded rebar! No more broken or shattered hammer bits; now you can drill right through the rebar and not have to relocate the lift or hole to avoid the rebar.

SVI Part Number	Diameter	Overall Length	Weight (lbs.)	Suggested RPM's
BH-7076-08	1/2"	12"	0.6	850-1200
BH-7076-10	5/8"	12"	0.8	750-1000
BH-7076-10A	5/8"	18"	1.3	750-1000
BH-7076-12	3/4"	12"	1.1	600-850
BH-7076-12A	3/4"	18"	1.6	600-850

Easy as

1

Mount a rotary rebar cutter in a standard 1/2" drill motor or 1/2" hammer drill (with the selector in the rotary-only position); insert the rotary rebar cutter into the hole and drill through the embedded rebar.

2

When rebar is encountered while drilling with a rotary hammer and carbide hammer bit, immediately stop the hammer and remove the bit from the hole (failure to stop will severely damage a carbide hammer bit - regardless of manufacturer's claim)

3

Remove the rotary rebar cutter after the rebar has been drilled completely through and finish drilling the hole with the rotary hammer and hammer bit.

NOTE: Carbide-tipped rotary rebar cutters are designed for use in a standard 1/2" drill motor, but a hammer drill with a standard 3-jaw chuck may be used provided the selector mechanism on the hammer drill is kept in the rotary only position. Carbide-tipped rotary rebar cutters are intended for **rotary** drilling only; percussion (hammering action) will damage the tool.

Lift Installation and Relocation Shims

HEAVY DUTY PLASTIC SLOTTED SHIMS

Extra-thick shims make it easy to level and align 2 and 4 post surface mount lifts. These rugged plastic shims will not corrode, rot or rust. A must have for every professional lift installer in the industry. Sold in convenient 50 packs or an assortment kit of 150 pieces.
