

BrakeVac EBB 1000

Electric Brake Bleeding System

- ▶ Complete Brake System Flush In Just 10 Minutes
- ▶ One Man Operation
- ▶ Fast and Easy Fill
- ▶ 2.5 Gallon Capacity Allows Up to 10 System Flushes Without the Need to Refill
- ▶ Adjustable Pressure Regulator Enables Operator to Adjust Operating Pressure Assuring Constant Pressure to All Four Wheels
- ▶ Extra Long 10 Foot Pressure Hose with Quick Disconnect Coupler Assures Full Lift Extension
- ▶ Fluid Level Indicator for Quick Visual Check of Fluid in the Reservoir
- ▶ Portable, Operates on 110 Volts AC

Part No. 500-8050

▶▶ MOTORVAC BRAKEVAC EBB 1000

Why use the MotorVac BrakeVac System?

The BrakeVac EBB 1000 electric powered pressure bleeder is a simple, user friendly and efficient way to flush and bleed today's high tech brake systems. Being electric powered, the EBB 1000 eliminates the hassles associated with both air pressure and vacuum style brake bleeding. This system can complete a full brake system flush in 10 minutes. The one man operation ensures maximum profitability for the shop by allowing other technicians to service other vehicles.

How the MotorVac BrakeVac System Works

The BrakeVac EBB 1000 bleed and flush process allows complete control and provides a systematic and efficient approach to conducting a thorough exchange service. First, the machine facilitates a timely, effective "one-man" operation that better protects the technician's safety and conducts an environmentally friendly service. The adjustable pressure regulator enable the technician to set the operating pressure between 0 and 80 PSI and more importantly maintains constant pressure at all four wheels throughout the service. The easy to read fluid level indicator eliminates the guess work by showing the exact fluid level at all times. In the event the bleeder runs low on fluid in the middle of a service, the low level warning indicator instantly informs the operator of a low fluid condition with its dual alert system. The BrakeVac EBB 1000 will automatically shut itself off, preventing air from getting into the brake system. The conveniently located fill tube makes refilling easy and fast. No more messy diaphragms or depressurizing necessary, just simply open the twist cap and pour. The BrakeVac EBB 1000 includes a complete set of custom adapters to service virtually all current vehicle models.

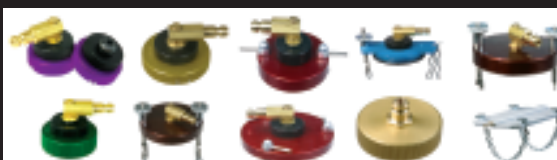

Benefits

- ▶ Simple – Machine conducts a full brake service with a one man operation
- ▶ Easy – Accessible functions and controls facilitate a quick and easy procedure
- ▶ Safe – No spilled fluid on the floor and exchange process protects both the technician and the vehicle
- ▶ Fast – Complete fluid exchange and treatment in about 10 minutes
- ▶ Portable – Unit is powered by a 110 volts AC and allows for greater flexibility to perform service
- ▶ Reliable – Virtual 100% exchange delivers the highest quality service to customers
- ▶ Free 1-800 Technical Support Team

Technical Specifications

- ▶ Power Cord – 16.5'
- ▶ Power Supply – 115V AC Operation
- ▶ Pressure Gauge - 0-85 PSI / 0-6 Bar
- ▶ Circuit Protection – 5 AMP Blow Fuse
- ▶ Hoses – 11.5'
- ▶ Tanks – 2.5 Gallon Capacity
- ▶ Pumps – 0.2 GPM
- ▶ Filter – Filters Down to 250 Micro Particles
- ▶ Ship Weight – 37.5 lbs.
- ▶ Ship Height – 25"
- ▶ Ship Width – 15"
- ▶ Ship Depth – 17"
- ▶ Cabinet – Metal Pressed
- ▶ One Year Limited Warranty

BrakeVac EBB 1000 Deluxe Adapter Kit

BrakeVac EBB 1000 includes a complete line of custom fit adapters that are quick and easy to install for a fast and effective service. This Deluxe Adapter Kit is also sold separately as an accessory.
