

SteerClean MPS 7000

The Complete Power Steering Flush and Exchange Service

- ▶ Complete PSF Exchange in Just 5 Minutes
- ▶ Services Both Pump Reservoir and Remote Reservoir Systems
- ▶ The Power Steering System is Flushed and Protected All-In-One Service
- ▶ Voice Module Keeps the Technician Advised of Service Procedures and Status
- ▶ Extra Long Wand Hose Provides for Easy Accessibility to the Machine and All Controls
- ▶ Easy Connection and Touch Pad Operation
- ▶ Portable, Operates on 12 Volt DC Power
- ▶ Sturdy, Compact Design In Protective Cabinet

The SteerClean Service Kit™ is specifically formulated to be used with the SteerClean System!

Part No. 500-7000

▶▶ MOTORVAC STEERCLEAN MPS 7000

Why use the MotorVac SteerClean System?

SteerClean is designed to exchange virtually all of a vehicle's power steering fluid in just 5 minutes with a few simple steps. The SteerClean service can increase a shop's profits by reducing the time it takes to do a complete exchange and simplifies the process for the technician. This new turnkey PSF service center is easy to use with a one-touch control and provides a highly effective service for all automotive vehicles.

The SteerClean System will ensure that you are conducting the best service possible. Friction and heat in the power steering system causes oxidation that breaks down the fluid and its lubricating ability. This can accelerate wear in the pump, valves and gears and result in expensive repairs. Debris and contaminants in the power steering system can cause the valves and other components to stick, dry and worn out seals can lead to leaks, and foaming can lead to vibration in the system, all creating difficult steering and problems in the system. The SteerClean Service will improve the operation of the steering system and extend its life.

How the MotorVac SteerClean System Works

The SteerClean advanced flush process allows complete control and provides a systematic and efficient approach to conducting a thorough PSF exchange and conditioning service. First, the machine determines the service times for each vehicle automatically. Then it facilitates a "one-man" operation, and the technician only needs to add the detergent flush solution and the new power steering fluid to the machine. Once this is done, just insert the wand into the power steering reservoir of the vehicle, press the Start switch and the SteerClean machine does the rest and tells the technician when the service is complete.

The SteerClean System includes a Voice Module that keeps the technician advised of the machine's progress throughout the exchange service cycle. The machine identifies each step of the service and signals both visually and audibly when the procedure is complete. The machine's wand is then removed, the fluid level is checked and the cap is tightened to finish the service.

The SteerClean is very user-friendly, portable and operates with 12-volt DC power. Its quality castors provide excellent maneuverability and the extra long wand hose allows for easy accessibility to the machine and all controls. The roto-molded cabinet is easy to keep clean and will not damage the vehicle.

Features

- ▶ Single wand and switch allows one-man operation.
- ▶ Voice Module provides step-by-step control of the process
- ▶ Front panel controls all machine functions
- ▶ Industrial grade hoses and connections
- ▶ Separate high volume pumps for vacuum and fill modes
- ▶ Free 1-800 Technical Support Team

Benefits

- ▶ Simple – The machine determines service times for the vehicle
- ▶ Easy – Accessible functions and voice module controls the procedure
- ▶ Safe – Completes exchange process without spills
- ▶ Fast – Complete fluid exchange and treatment in 5 minutes
- ▶ Portable – Unit is powered by a 12 volt DC battery and can be used anywhere
- ▶ Convenient – No bay space is required to perform the service
- ▶ Reliable – Virtual 100% exchange for a high quality service

Technical Specifications

- ▶ Power Cord – 10' (3m), 14 Gauge
- ▶ Power Supply – 12 Volt DC Operation
- ▶ Circuit Protection – 10 Amp Circuit Breaker
- ▶ Hoses – Two Service Hoses 9', Waste Hose 5'-8"
- ▶ Tank – 5 Quarts (4.7 Liter) Waste Oil
- ▶ Pumps – Three @ 1 GPM, One @ 1.8 GPM (Suction)
- ▶ Filter – Internal Screen Mesh (Waste Tank)
- ▶ Ship Weight – 85 lbs.
- ▶ Ship Height – 43"
- ▶ Ship Width – 24"
- ▶ Ship Depth – 19"
- ▶ Cabinet – Roto-molded
- ▶ One Year Limited Warranty
